We Empower Your Resources

<u>Paath Shaala - School Management System</u>
Makes managing School a child's play

Paath Shaala is an integrated and comprehensive software that spans across all functional requirements of a any educational institute. It has evolved and matured over a period of last 5 years by feedback from its customers and experts on advisory board. It is being used by various Schools, large and small alike, across the state. Our customers have been also providing excellent references and we value that to be our strongest marketing point. This software has been prepared keeping in mind the time a staff has to spend on finance and result management and to do repetitive work. Using this software, his time in checking the finance is reduced considerably enabling him to focus on students and other activities of the school.

This software will cater to the needs for fees collection from students, information about the students and preparation of mark sheet for their results. The school does not have to bother as to how much fees is to be collected and from whom. The fees defaulters would be displayed just at the click of a button. Besides this, reports like Head Wise collection, List of students, etc. will not become a night mare for staff. All these and more will be available just at the click of a button

Paath Shaala would require to very precise and result into cost cutting and efficient management. We have developed this revolutionary product to be accurate in its approach and suit all environments including large, medium or small schools. The crucial points that emphasis on are listed in the following paragraphs which in turn justify your purchase.

- You will require less number of Staff to cater more students in same time or even less. You would have the choice to re-deploy them at other suitable locations.
- It not only provides an opportunity to the school to enhance their students care but also can increase the profitability of the organization.
- School Management Software would enable school to serve the rapidly growing number of students in a cost-effective manner.
- School administrators would be able to significantly improve the operational control and thus streamline operations.
- This would enable to improve the response time to the demands of student because it automates the process of collecting, collating and retrieving student information.
- The senior staff would spend his precious time more in student all round development than to put in clerical activities otherwise.
- This software interface would also save them a lot of time for special jobs only.
- Accounting sometimes becomes awfully pathetic and complex. This product will eliminate any such complexity, since the retrieval of information through its MIS will become virtually on the tip of your fingers.
- The entire application is menu driven to help users navigate between screens and fields.
- Very important for some, the reduced cost of the manpower would pay for the cost of this product with in a short time after its implementation.
